

HOPELESS

Colleen Hoover

Sky, a senior in high school, meets Dean Holder, a guy with a promiscuous reputation that rivals her own. From their very first encounter, he terrifies and captivates her. Something about him sparks memories of her deeply troubled past, a time she's tried so hard to bury. Though Sky is determined to stay far away from him, his unwavering pursuit and enigmatic smile break down her defenses and the intensity of the bond between them grows. But the mysterious Holder has been keeping secrets of his own, and once they are revealed, Sky is changed forever and her ability to trust may be a casualty of the truth.

THEY BOTH DIE AT THE END

Adam Silvera

On September 5, a little after midnight, Death-Cast calls Mateo Torrez and Rufus Emeterio to give them some bad news: They're going to die today. Mateo and Rufus are total strangers, but, for different reasons, they're both looking to make a new friend on their End Day. The good news: There's an app for that. It's called the Last Friend, and through it, Rufus and Mateo are about to meet up for one last great adventure—to live a lifetime in a single day.

EVERYTHING YOU NEED TO KNOW ABOUT THE MENOPAUSE

Kate Muir

Muir draws on interviews with the leading medical experts in the field, interlaced with her own tumultuous journey through the menopause and the personal stories of women from all walks of life, sharing their varied experiences and hard-earned wisdom.

Muir also questions why the current medical establishment is getting the menopause so wrong, as she debunks the myths that surround hormone replacement therapy and exposes the sloppy science and hysterical headlines that have had a negative impact on women's health for the last twenty years.

HOW THE BRAIN WORKS

Drawing on the latest neuroscience research, this visual guide makes the hidden workings of the human brain simple to understand. How the Brain Works begins with an introduction to the brain's anatomy, showing you how to tell your motor cortex from your mirror neurons. Moving on to function, it explains how the brain works constantly and unnoticed to regulate heartbeat and breathing, and how it collects information to produce the experiences of sight, sound, smell, taste, and touch. The chapters that follow cover memory and learning, consciousness and personality, and emotions and communication.

THE FAMILY REMAINS

Lisa Jewell

LONDON. Early morning, June 2019: on the foreshore of the river Thames, a bag of bones is discovered. Human bones.

DCI Samuel Owusu is called to the scene and quickly sends the bag for forensic examination. The bones are those of a young woman, killed by a blow to the head many years ago.

Also inside the bag is a trail of clues, in particular the seeds of a rare tree which lead DCI Owusu back to a mansion in Chelsea where, nearly thirty years previously, three people lay dead in a kitchen, and a baby waited upstairs for someone to pick her up.

The clues point forward too to a brother and sister in Chicago searching for the only person who can make sense of their pasts.

Four deaths. An unsolved mystery. A family whose secrets can't stay buried for ever ...
